

Follow the Money

Frankie had five weeks and one jar. Every scheme made money... or did it? Work out what is in the jar after each one. (Best after you finish the book.)

In the jar at the start: \$23.40

1	The front-gate sale	+ \$11.50	Jar: \$ _____
2	Buying things back (Dad's spanner, Alfie's horse hat)	- \$9.00	Jar: \$ _____
3	Bunting & Dev Dog Walking	+ \$45.00	Jar: \$ _____
4	A new lead and dog treats	- \$20.00	Jar: \$ _____
5	Bonanza supplies	- \$40.00	Jar: \$ _____
6	Bonanza takings (it hailed)	+ \$6.00	Jar: \$ _____

A. After five weeks, is Frankie richer or poorer than when she started? By how much?

B. The Blagg 9000 costs \$899.95. How much more does Frankie need now?

What did it cost that wasn't money?

Every scheme cost Frankie something she needed. Pick one scheme. What did she lose that you can't put in a jar?

ONLY 3 LEFT!

Clive's sign said this for a whole year. How is a sign like that trying to make you feel? Have you seen one?

Answers: 1) \$34.90 2) \$25.90 3) \$70.90 4) \$50.90 5) \$10.90 6) \$16.90 A) Poorer, by \$6.50 B) \$883.05
